

Safestor

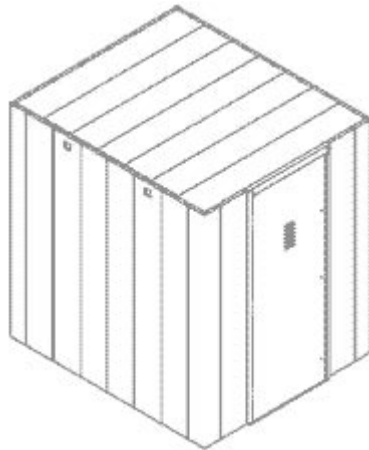

A heavy duty modular enclosure which can be used as a strong room or secure cabinet.

Construction - 3mm thick steel for doors and panels. Vision and cable entry holes are reinforced with 10mm steel plate.

Modular - Extremely adaptable. Based upon 300mm repeat patterns. It can be reconfigured at any time to suit specific requirements.

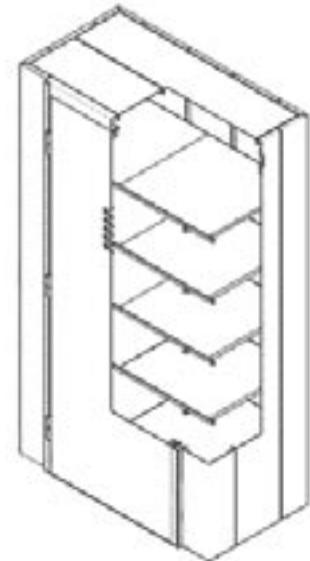

Doors - As standard, doors are left hand hinged and outward opening, so as not to compromise on security. They come with independent 3 point locking - 5 lever BS3621 mortise dead locks and heavy duty dog bolts.

Installation - Manageable 300mm sections ensure easy and safe installation.

Safestor - Strong Room Units

Configured as a strong room, Safestor is bolted to the floor.

Safestor - Cabinet Units

Safestors configured as cabinets are supplied with a floor and shelving, ideal for storing high value items.
